

## Custom Made Models

Eurotramp offers beside the wide range of standard products also individual solutions for your personal demand.

We are able to produce trampolines with many different dimensions. We have the possibility to produce a wide variety of frames, frame pads and jumping beds.

Please send us a technical drawing with your ideas. We will check out, give information about possible materials and quote the custom made models within shortly.

**Though we have normally very short delivery times you should plan for complex custom made models delays from at least 6-8 weeks.**
