AVAILABLE  
FOR  
PLAYGROUND  
LOOP  
AND  
PLAYGROUND  
LOOP XL

## PlayPro™ natural rubber impact protection ring

- ✓ Smooth transition between trampoline and EPDM surface or artificial turf
- ✓ Optimal and durable fall protection to the trampoline inner edge (shock-absorbing)

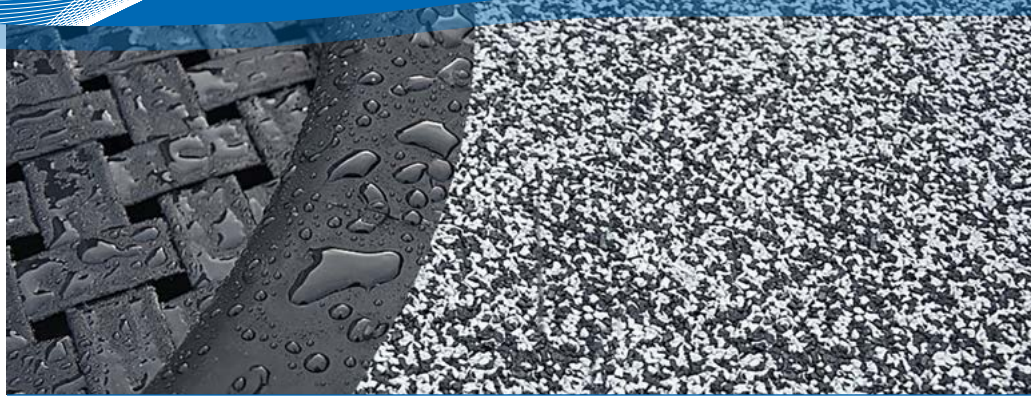

PLAYPRO™

EUROTRAMP®

**Robust and durable:** PlayPro™ is especially suitable for heavily used trampolines.

The PlayPro™ impact protection ring made of non-slip natural rubber serves as edge protection and creates a smooth transition between the trampoline and the surrounding ground covering, e.g. to EPDM surface or artificial turf.

PlayPro™ is glued to the trampoline frame before the surrounding ground covering is applied.

PlayPro™ was developed by Rampline in cooperation with Eurotramp and meets the requirements of DIN EN 1176.

Eurotramp Kids Tramps – awarded several times:

besonders entwicklungsfördernd

Ein Qualitätssiegel der Bundesarbeitsgemeinschaft für  
Haltungs- und Bewegungsförderung e.V.

Suitable for playgrounds  
according to DIN EN 1176
